

SCANTI

Always know what's **changing**

Your construction site.
Instantly accessible.

Investor Pitch Deck

April 2026

Data isn't the problem

Consistency is

Construction sites are documented
Inconsistently and in different ways.

The result: no reliable source, no timeline, no clarity.

Person A

Random Angles

Person B

Misses areas

Person C

Blurry images

NO CONSISTENT CAPTURE

95%

of construction data goes unused¹

\$1.8T

lost annually in the construction
industry due to inefficiencies²

30%

of project time is lost in rework and delays³

The technology
is finally here.

Sensors are cheap

360° cameras < USD 500

Robotics is accessible

Built for autonomy

AI is powerful

Understands reality

Consistent capture Every single day

Our N.E.X One autonomously navigates your site, captures 3D model the same way, every-time, creating a reliable day-by-day visual record you can trust.

5-15min
typical scan time
per route

~90%
smaller data size
vs LiDAR workflows

Minutes
to upload and process
vs hours with LiDAR

Any device
access your site from
anywhere, anytime

From site to insights

Scantix captures, processes and structures your site data so you get clear, accurate insights without the manual work.

3D MODEL

High-fidelity 3D model of your site.

TIMELINE

See progress over time with aligned, comparable captures.

MEASUREMENTS

Accurate measurements anywhere on the site.

NOTES & ANNOTATIONS

Add notes, mark issues and track the construction.

ANYWHERE, ANYTIME

Access your site from any device, from anywhere.

Distinct timeline, funds to accelerate deployment

Use of funds over time

Raising capital to reach deployment

SCANTIX is moving from early prototype workflow to real construction-site pilots.

We are raising capital to build the first system, validate it on active sites, and prepare the product for early enterprise use.
